CUSTOM EPS FOAM PRODUCTS

Form your own idea...

PCF architectural foam shapes give you the opportunity to bring classic excitement to any of your projects. **You have the questions, PCF has the answers!**

What Are Foam Shapes? PCF Architectural Shapes are decorative treatments used to add exciting dimensions to any interior or exterior surface easily and economically. Cut from high quality Expanded Polystyrene (EPS), our 1, 2 and 3 pound density shapes are dimensionally stable, moisture-resistant, lightweight and lasting. PCF can help you create cosmetic architectural style and deliver innovative, custom designed beauty using PCF's door and window moldings, arches, columns, and much more!

Are Foam Shapes Cost Effective?

PCF delivers foam products and service faster, with better quality at significantly less cost than wood or cement treatments. Our state-of-the-art production facility uses advanced fabricating techniques to give you endless design capabilities! Computerized foam cutting equipment guarantees a whole new level of accuracy and quality design.

What Are the Advantages of Foam Shapes? PCF shapes can be purchased as foam only, pre-primed, with or without reinforced mesh netting, and ready for application of interior and exterior finishes. PCF shapes can be designed for new construction, existing structures and remodels. Installation is easy and inexpensive. Add a touch of architectural class to any building. Increase the value of your home and get worry-free beauty for years. PCF is proud to stand behind the products it fabricates with a commitment to complete customer satisfaction.

Can I Design Any Shape?

YES! Your imagination is your only limitation. Architectural foam has literally thousands of custom design possibilities. Call PCF and talk to our professional staff. Fax us your design for a free estimate. We'll provide a quote fast... if not on

the spot, within 24 hours.

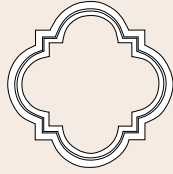

Visit our unique showroom and let your ideas take form!

PCF/INSIDE

We have launched a new venture called **PCF/Inside, LLC**, to emphasize foam products for interior applications. Our products, delivered ready for installation and painting, include crown and cove moldings, columns, domes, niches, arches, fireplace

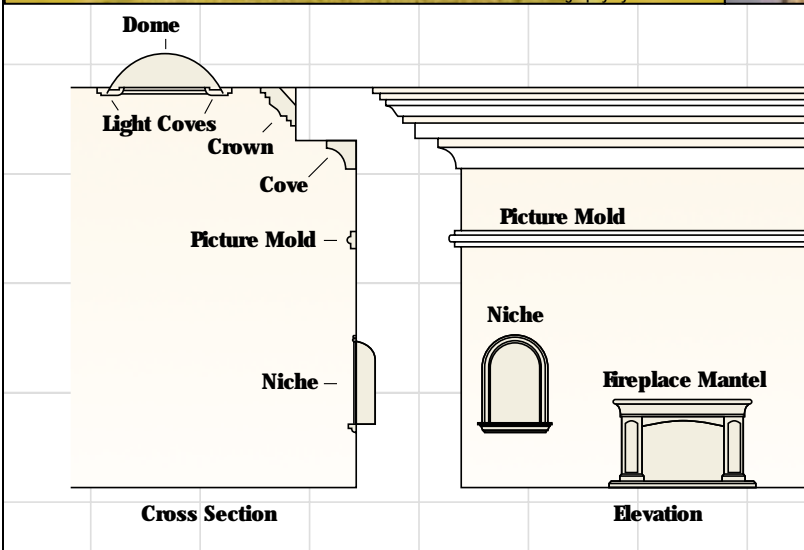

surrounds, light coves, and mantels. Our products are designed for use in hotels, office buildings and homes. Foam products can be easily customized so we can quote to your plans and specifications. Also, since foam is light in weight, we can fabricate products that are larger than comparable materials and still be less expensive to install.

Vision Statement

Pacific Coast Foam is San Diego's most preminent fabricator of expanded polystyrene foam shapes.

Preminent means:

We consult with the customer to make the purchase experience cost effective, pleasant, and satisfying

We inform and service those who specify and/or use EPS foam products.

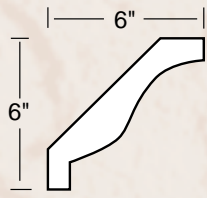

We supply the correct foam product economically and on time to make each project successful.

We use only the highest quality of materials and partner with suppliers that provide service second to none

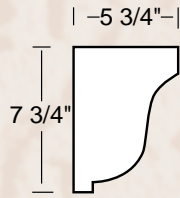

We set performance standards by which everyone else is measured.

Our clients remain customers for life.
